InHouse Physicians Launches Worksite Health Centers at Mary Kay Cosmetics

Two New Worksite Clinics Provide Employee Healthcare to over 2000 Mary Kay Employees

ST. CHARLES, IL—InHouse Physicians, S.C. (IHP) today announced the launch of two worksite health centers at Mary Kay Cosmetics. InHouse Physicians is offering the onsite medical services at both Mary Kay's global headquarters and manufacturing facility in the Dallas, Texas.

IHP is delivering high-quality population risk stratification, ambulatory care, primary care, and disease management services with an emphasis on concierge medicine.

The selection criteria identified by Mary Kay included a vendor who offered cutting-edge cost containment strategies, demonstrated an ability to be flexible to changing needs, and fostered a corporate culture that aligned with Mary Kay's commitment to caring about its employees' health.

IHP's cost containment strategy includes a number of innovative tools including:

Risk Stratification - Before the clinic even launches, the employer benefits from powerful analytic software tools that can filter through claims data to determine gaps in care for individuals and identify "high risk" members that require additional intervention.

Patient Centered Medical Home – IHP's preventative services and integrated management of chronic diseases with the local medical community drives improved quality of care and lower costs for our clients.

Patient Advocacy and Price Transparency – The on-site medical staff leverages InHouse Physicians' claims database-directing employees to high quality healthcare services that provide the best value healthcare options.

Case Rate Negotiations - IHP targets our client's highest cost drivers and identifies procedures and surgeries that are driving a significant portion of these costs. We then negotiate case rates with local providers and hospitals anchoring quality performance guarantees to these contracts.
